Quality Control Setup

TEST EQUIPMENT AND FACILITIES

We believe that the expectation of our customer comes above all. We are committed to achieve customer satisfaction and our endeavor shall be continuous improvements in all our operations supported by sound quality discipline (ISO: 9001:2015) in the line.

PROCEDURE FOR QUALITY CONTROL

All the Raw Materials used for manufacturing are purchased along with Test Certificate of Chemical & Physical analysis. All the operations are carried out in-house to ensure High Quality Products. To control the quality of the products, measurements are carried out at different staged of manufacturing by the respective production workers & Q.C. Inspector.

The instruments used by the workers for making measurements are calibrated / cross checked with the instruments that are available in the inspection room. Random checking of products is carried out by the inspection person / supervisor to counter check the quality of production. Once the products are manufactured in all respects & ready for packing, Final Inspection or 100% inspection is carried out by inspection person or supervisor for dimensional parameters and any other parameters specified by customer.
